Bookkeeper.

MISS ELSIE S. FREDERICK,
Stenographer and Teacher of Stenography
and Penmanship.

MRS. EMMA KEISER,
Matron.

MRS. MYRTLE STEVENS,
Librarian.

THE SCHOOL.

The East Stroudsburg State Normal School was established in 1893 by virtue of an Act of Assembly passed in the spring of that year. The fourth district, of which this school is the legally constituted state training school for teachers, embraces the counties of Wayne, Lackawanna, Luzerne, Carbon, Northampton, Monroe and Pike. In population, wealth and matters educational this is one of the foremost districts in the State.

The school has always been progressive and is constantly seeking improvement. It has been very successful in imparting to its graduates a high degree of scholastic attainment. Its professional courses of study have been developed with great care and are exceptionally complete and thorough. The model school is always well filled and is unusually large in comparison with similar departments of other schools. It affords the best of practical training under well-nigh ideal conditions.

Location

The school is located among scenes of beauty unsurpassed, and probably unequalled, anywhere else in our state. Three miles away to the east is the famous Delaware Water Gap; fifteen miles to the west is Mount Pocono; between lies the country which because of its varied and picturesque natural attractions brings many thousands of people annually to it for health and recreation. The elevation, the purity of the atmosphere, the number of swift running streams of pure water, and the delightful climate give the school a location as healthful as it is beautiful.

Buildings and Grounds

The main school buildings are four in number:

1. The **Administration and Dormitory Building**. This is a fine structure of brick and stone, four stories high. It contains the school offices, the library, music rooms, chapel with seating capacity for 900, and dining room in which 400 can be comfortably seated. The north and south wings of this building contain the dormitories for the girls.

2. The **Recitation Hall**—one of the finest and best appointed buildings for the purpose to be found anywhere. It contains fifteen well lighted recitation rooms, including large and well equipped laboratories, besides a number of additional rooms provided for the convenience and comfort of teachers and students.

3. The **Model School**—a thoroughly modern building similar in size and general type of architecture to Recitation Hall. On the first two floors are the office of the Model School principal, the library, the Model chapel, and the Model school rooms. No better facilities for a practice school are to be found anywhere.

The two floors over the Model School contain the dormitories occupied by the boys.

4. The **Gymnasium**. This is a large and substantial brick building with a floor space 60 by 90 feet, and an annex 40 by 80 feet, containing reception room, office and apartments for the instructor. The gymnasium is completely equipped with standard apparatus and offers all facilities for work in physical training. A fine athletic field with quarter-mile track and grand stand is in the rear of the gymnasium.

A hospital building containing rooms for a number of patients, is located east of the gymnasium. This building is comfortable, inviting, and fully furnished for its purpose.

The boiler and engine house, in which the heating, lighting and power plants are housed, is located on a plot of ground adjoining the school campus on the north.

All the buildings are heated with steam and lighted with electricity.

The campus is very spacious, comprising more than twenty-three acres of ground. The many beautiful trees, attractive walks, well-kept lawn, and effective grouping of the buildings present a most pleasing appearance. The handsome and costly entrance to the campus was erected by the alumni of the school. During the present year the alumni have presented the school with the beautiful Alma Mater monument in honor of the graduates, teachers and students who served in the great war. This monument is an admirable work of art and adds greatly to the beauty of the campus.

Purpose of the School

The purpose of state normal schools is to train teachers to carry on the work of public education. Their course of study is planned with this special object in view. The record of our graduates as thoroughly trained, resourceful teachers speaks for itself as to the success of East Stroudsburg Normal in realizing its aim as a teacher training school.

Many students, however, have prepared for college in our school, and many others have pursued special courses planned to meet a wide range of individual needs. The Normal Elementary School, Junior High School and Senior High School offer facilities for work of elementary or high grade along general academic, commercial, vocational or professional lines under ideal conditions as to instruction, equipment and general environment.

REPORT OF COMMITTEE

on

REVISION OF NORMAL SCHOOL COURSE OF STUDY

Adopted March 23, 1920.

Requirements For Admission.

1. Graduates of approved secondary schools who can present evidence of having completed fifteen units of high school work will be admitted as regular students to the state normal schools.

*2. A unit shall consist of not less than thirty-six weeks of work requiring at least four periods per week of not less than forty minutes per period or its time equivalent. (Subjects not requiring out-of-class preparation or study shall require double time in estimating the units.)

3. Credentials of all students entering the state normal schools shall be received and evaluated by the normal schools and submitted to the State Department of Public Instruction for approval.

4. Adequate knowledge of the subject matter in the elementary subjects will be presupposed on the part of all students admitted to the normal schools.

5. Required units for admission:

English	3 units.
Mathematics	1 unit.
Science	1 unit.
Social Studies	1 unit, after Sept. 1923, 2 units.
Elective	9 units, after Sept. 1923, 8 units.

Total	15 units.
-------	-----------

6. The holders of permanent and professional certificates will be given one unit credit toward admission as regular students to the normal schools for each subject of high school grade written on the certificate.

7. Advanced credit will be given for equivalent courses in approved teacher training institutions, but no student may obtain a normal school certificate without a minimum residence of one year.

8. For the present the normal schools shall, when necessary, conduct a secondary department of first class high school grade for these students who do not have similar high school facilities available in their home communities.

* The unit as here defined consists of a minimum of ninety-six hours. The Carnegie unit, which will be recognized after September 1, 1920, by the high schools of the State, is a unit of one hundred and twenty hours. As soon as the reorganization of the high schools of the State justifies it the state normal schools will require the Carnegie unit of one hundred and twenty hours.

CURRICULA OF THE PENNSYLVANIA STATE NORMAL SCHOOLS

Students Must Select One of Four Curricula.

The four curricula that are offered to students have been organized upon the principle that teaching in the elementary schools can be classified into sufficiently definite types to require specialization. Each curriculum prepares for a specific type of teaching position.

The two year's work of the normal school is divided into four semesters. The work of the first semester is the same for all students. A large purpose of the work of the first semester is to acquaint students with the requirements for successful teaching in the different grades so that they may be able to decide intelligently in what grade or grades they prefer to teach. The course entitled "Introduction to Teaching" which includes observation and participation in the training school is especially designed to aid students in a wise selection of a curriculum.

At the end of the first semester students are asked to select one of the four curricula for the purpose of specializing in a specific field of teaching. The work of each curriculum must be completed in its entirety. Students may be granted the privilege of changing from one curriculum to another only on condition that the prescribed courses of any curriculum so selected must be completed before a certificate of graduation is granted.

The Four Curricula.

Group I —Kindergarten Primary—for teachers of Kindergarten and grades 1, 2 and 3.

Group II—Intermediate grades—for teachers of grades 4, 5 and 6.

Group III—Grammar Grades and Junior High School—for teachers of grades 7, 8 and 9.

Group IV—Rural—for teachers of rural schools.

ELECTIVES

All electives are taught from the professional point of view and are of college grade of work.

All electives are to be chosen with special reference to the group in which the teacher is preparing to teach and with the approval of the principal of the school.

Each normal school is required to offer at least one elective in each of the six groups of electives. Additional electives of similar grade may be offered at the discretion of the principal of the school.

BRIEF DESCRIPTION OF THE COURSES OF STUDY

The State Course of Study.

The state course of study is used as the basis for the courses in the teaching of the elementary school subjects.

Classification and Numbering of Courses.

All courses are classified in seven departments. All courses numbered below 10 are common to all groups. A decimal indicates that two or more courses of the same department occur in the same semester. A single digit or the last of two digits indicate the semester in which the course occurs. The first of two digits indicates the group in which the course occurs.

Education.

Education I—Introduction to Teaching.

All groups, 1st semester. 4 periods, 3 hrs. credit.

The primary purpose of this course is to aid students in selecting a specific curriculum at the end of the first semester, and to imbue them with a strong professional spirit and high standards of professional ethics. It includes consideration of the different types of teaching service, the general aims of the public schools and, more specifically, the work to be accomplished by the primary, intermediate, junior high and rural schools respectively, a brief sketch of the characteristics of children in these different types of schools and the qualifications required of teachers to meet the needs of children at the different age levels in these different types of schools. The broad social aims of each type of school and its relation to the state are emphasized.

The instruction in this course is closely correlated with frequent visits of observation and participation in the training school.

Education 2—Psychology and Child Study.

All groups, 2d semester. 3 periods, 3 hrs. credit.

This is an elementary course in psychology combining the important topics of both general and educational psychology, and forming the basis of the specific courses in educational theory and practice. The chief topics considered are: (a) instinctive tendencies; (b) habit-formation; (c) memory, association (including localization of functions), and economy of learning; (d) the effective life; (e) the thought processes; (f) the extent and causes of individual differences among children, and the use of intelligence tests in determining them; (g) the treatment of exceptional children. About one-third of the course is given to the study of the characteristics of children at the different levels of growth. One laboratory period each week is given to the observation of children. While this course is practically identical in all curricula, there is differentiation in the observation of children and in the laboratory experiments, each group emphasizing the characteristics of children at the age level of its particular curriculum.

Education 12—Kindergarten Theory.

Group I, 2d semester. 2 periods, 2 hrs. credit.

This course deals primarily with kindergarten aims, purposes, technique, and equipment. Special attention is given to modern tendencies in kindergarten practice, and particularly to the relation of the kindergarten to the primary grades. Observation and participation in the training school is a prominent feature of the course.

Education 13—School Efficiency.

Group I, 3d semester. 3 periods, 3 hrs. credit.

This course correlates closely with the student teach-

IN HONOR OF 208 WHO SERVED IN THE GREAT WAR

THE TENNIS COURT

ing, deriving a large part of its meaning from the teaching experience of the student. The instruction is shaped by the aim and purposes of the kindergarten and grades one, two and three, and includes such topics as: class-room routine, the organization of the daily study and recitation program; hygienic standards for and care of class-rooms; the making and keeping of records; and is followed by the analysis and study of such class-room technique as: the significance of the play spirit in the primary grades; the management of primary grades; the use of seat work; the value of dramatic expression; types of class-room exercises applicable in the primary grades; and the project and problem method as applicable to children of this age; and the practical application of educational tests and scales.

Education 23—School Efficiency.

Group II, 3rd semester. 3 periods, 3 hrs. credit.

This course correlates closely with the student teaching, deriving a large part of its meaning from the teaching experience of the student. The instruction is colored and shaped by the purpose and nature of the work in the intermediate grades and includes class-room routine, the daily study and recitation program, hygienic standards for and care of class-rooms, the making and keeping of records, and is followed by the analysis and study of such class-room technique as: methods of lesson assignment; types of class-room exercises; efficient methods of study; types of questioning; the value and uses of intelligence and educational tests; and the project and problem method as applicable to the fourth, fifth and sixth grades. The problem of discipline in these grades receives attention.

Education 33—School Efficiency.

Group III, 3d semester. 3 periods, 3 hrs. credit.

This course deals with the principles of instruction

common to the teaching of all subjects in the seventh, eighth and ninth grades and is closely correlated with student teaching. Consideration will be given to such topics as types of lessons, the recitation, the assignment, the question, the project and problem method, the socialized recitation, lesson plans, supervised and independent study, the use of educational tests and scales, problems in discipline, economy in classroom management. A considerable part of the time of this course is devoted to a discussion of educational guidance problems. The course analyzes the processes and problems of the important types of human occupations, the aptitudes and training required for each, the financial rewards, the hazards, the opportunities and avenues for advancement in each field. As far as possible typical occupations are studied at first hand, including occupations of agriculture, manufacture, transportation, exchange, public service, professional service, domestic and personal service, and clerical occupations. The pertinent printed matter in books, pamphlets and magazines is examined and organized.

Education 43—Primary Methods.

Group IV, 3d semester. 3 periods, 3 hrs. credit.

This is a complete course including the best modern primary methods in number, geography, history, and handwork. It is devoted to a consideration of environmental materials in geography and the development of correct geographical concepts; to the aims and purposes of history in the primary grades and the materials available for these grades, with emphasis on the selection of materials for patriotic and other special days; to the best methods of inculcating in children simple health habits; and to the best available means of seat work through paper cutting, weaving, clay modeling, etc.

Education 4—History and Principles of Education.

All groups, 4th semester. 4 periods, 4 hrs. credit.

This is an integrating course and aims to bring together and interpret the details of educational theory and practice represented by the preliminary courses, and to leave with the student a unified body of educational doctrine. The course begins with a brief review of the origin and development of present day practices and tendencies in public school education, the large emphasis being placed on these movements that have originated, or at least have come into prominence, since the time of Rousseau. The discussion of such topics as: the aims and purposes of education; the development of various conceptions of educational values; and the history and present status of such educational movements as: vocational education; the treatment of backward children; scientific measurements; the junior high school; the doctrine of interest; formal discipline; the transfer of learning; project and problem teaching; and the socialized recitation.

Education 44—Rural School Problems.

Group IV, 4th semester. 3 periods, 3 hrs. credit.

The aim of this course is similar to that of the course in School Efficiency in Groups I, II and III, and includes in addition the defects of the one-room rural school treated constructively, not destructively; the advantages of consolidation; the organization of the rural school; the daily study and recitation program reducing the number of classes by combining grades, alternating grades, correlation, etc.; vitalizing the course of study; club work; community center work; heating and ventilation; play and recreation; and beautifying the school grounds. The discipline of the rural school is discussed.

Education 3—Student Teaching.

All groups, 3rd semester. 10 periods, 10 hrs. credit.

THE TRAINING SCHOOL. The training school is the pivotal point of all work of the normal school. It

functions as a laboratory for every department of the school and articulates with peculiar intimacy with the Department of Education.

OBSERVATION AND PARTICIPATION. Although student teaching is confined to the senior year, junior students are given frequent opportunities for participation in the work of the training school and observation of expert teaching in the training school is a feature of all the courses in education and of many other courses throughout the curricula. One critic teacher is assigned to each two class rooms and demonstration lessons are taught from time to time in exemplification of the various phases of good educational practice.

DISTRIBUTION OF TIME. A minimum of two consecutive sixty-minute periods per day for one semester is given to student teaching. Where two student teachers are assigned to the same class in the training school the assignments are so adjusted that each student teacher has a definite problem. The distribution of teaching time is designed to progressively give to the student an increasing class responsibility.

LESSON PLANS. Plans forms are used upon which all lessons taught by student teachers are planned. Critic teachers hold daily conferences with the student teachers under their charge and approve all lesson plans of student teachers before the lessons are taught.

STUDENT TEACHERS. Every student teacher confines his teaching to the grades of the group which he has elected. Student teachers electing group I and group II have practice experience in all the subjects of the curriculum and, if possible, in all the grades of the group. Student teachers electing group III confine their practice teaching largely to the subjects in which the student has elected to specialize and, if possible, have practice teach-

ing in all the grades of the group. Student teachers electing group IV confine their practice teaching largely to the rural one-room ungraded school and have opportunity for contact with the community problems. All assignments for student teachers contemplate the completion of a unit problem.

TRAINING CLASSES. Training classes aim to have not less than twenty nor more than thirty pupils; that is, enough pupils to set up a normal social situation and yet not so many as to unduly tax the limited skill of the teacher.

THE PUPILS. The pupils in the training school by reason of the careful planning of each lesson and the close supervision of expert teachers, as well as through the use of abundant and elaborate equipment of the normal school, are most favorably situated to secure the best possible education.

ENGLISH AND FOREIGN LANGUAGE

English.

English 1—English Fundamentals.

All groups, 1st semester. 3 periods, 3 hrs. credit.

The purpose of this course is to acquaint the student with the source of material in English and the forms of correct expression.

A definite standard of written and spoken English must be acquired and maintained by all students. Further work in English without extra credit will be required of all who fail to reach and maintain this standard.

A few periods of instruction are given in the method of classifying and cataloguing books and in the use of reference books, readers' guides, etc.

About a third of the time of the course is devoted to a thorough review in the basic principles of English grammar and special attention is paid to the structure of sentences and the syntax of their various parts. The course includes a brief history of the language and the principles underlying its development.

About a sixth of the time of the course is devoted to a study of words including pronunciation, diacritical marking based on a generally recognized system of phonetics and attention is paid to basic principles in etymology.

English 1.1, 2.1—English Composition.

All groups, 1st and 2d semesters. 2 periods. 2 hrs. credit each semester.

This course includes a thorough study of the forms of English prose composition together with much practice in writing. The four types of English prose; narration, description, exposition, and argumentation are carefully studied and analyzed with reference to form, content and

technique. Special attention is given to the essay and the short story as media of prose expression and students are required to write frequent themes illustrative of the various prose forms discussed. These are made the subject of class criticism and discussion. The teacher in charge of the class meets the students from time to time for personal consultation.

English 2—Oral Expression.

All groups, 2d semester. 2 periods, 2 hrs. credit.

This course is designed primarily to insure (1) a good teaching voice and (2) effective address with facility and ease in oral expression.

English 13—The Teaching of Primary Reading.

Group I, 3d semester. 3 periods. 3 hrs. credit.

The primary aim of this course is to enable the student to acquire skill in the teaching of reading to beginners including the development of skill in the use of phonics. The course includes a comparison of the principal methods of teaching reading and the historical development of various methods of teaching reading are traced. Consideration is given to the psychological processes involved in reading. The student acquires familiarity with the means of measuring efficiency in reading. This course is accompanied with observations of primary reading classes as well as the actual teaching of reading.

English 23—The Teaching of Oral and Written Composition.

Group II, 3d semester. 2 periods. 2 hrs. credit.

The aim of this course is to ascertain how to secure free self expression from the pupil in oral and written composition. Special stress is placed upon oral composition as speech functions more largely than written composition in life. The prospective teacher is made to realize the necessity of assisting the pupil to form clear percepts and images as a basis for clear expression. The

acquisition of a vocabulary by the pupil and his manner of applying it in the expression of his thought is carefully studied. Easy and natural transition from oral to written composition is the end sought in the teaching of composition. The use of standard measurements and tests in oral and written composition is taught in connection with this course.

English 43—The Teaching of Oral and Silent Reading.

Group IV, 3d semester. 3 periods, 3 hrs. credit.

The aim of this course is to enable the student to acquire skill in the teaching of reading to beginners and the handling of the technique of silent reading with older pupils. Attention is given to the development of skill in the use of phonics. Consideration is given to the psychological process involved in reading. The student acquires familiarity with the means of measuring efficiency in oral and silent reading. The course includes a comparison of the principal methods of teaching reading and is accompanied with observations of oral and silent reading classes as well as the actual teaching of such classes.

English 14—Children's Literature and Story Telling.

Group I, 4th semester. 3 periods, 2 hrs. credit.

This course involves the collection and study of literature in verse and prose suited to children of this age. The selections are studied for the purpose of finding the elements contained therein that are likely to appeal strongly to children. The study of folk tales and fairy stories is included in this course.

The course in story telling covers the principles involved in telling stories to children. It involves also the application of the principles of child psychology and voice training to the telling of stories.

English 24—Juvenile Literature and Silent Reading.
Group II, 4th semester. 3 periods, 2 hrs. credit.

This course is planned to give a foundation for teaching literature and silent reading to pupils of the intermediate grades.

It aims to give an adequate knowledge of those literary types that are most suitable for children of this age.

Magazines and current literature are studied and selections made from these sources as well as from standard authors.

A study is made of the difficulties that children meet in their effort to comprehend thought from the printed page. Students are made familiar with the scientific measurements of silent reading.

English 34—Juvenile Literature and Silent Reading.
Group III, 4th semester. 3 periods, 2 hrs. credit.

This course aims to make an intensive study of the literature suitable for pupils of the grammar grades and junior high school.

Emphasis is placed upon the ethical situations developed in the reading of pupils of this age. The course also aims to give students control over the technique of teaching silent reading. Students become familiar with the standard measurements of silent reading.

Mathematics

Mathematics 12—The Teaching of Number.

Group I, 2d semester. 2 periods, 2 credits.

This course covers intensively the work in arithmetic of the first three grades. Parallel with this is a careful consideration of the approved methods of developing number concepts, of providing measurements and other forms of application, of correlating the number work with the work of other subjects, of conducting drill on number

“facts,” etc. The methods are illustrated by the observation of actual work with children, by demonstration lessons, and by the study and use of simple apparatus and materials, visual aids, etc. A sketch of the historical development of methods of teaching primary arithmetic is a feature of the course.

Mathematics 22—The Teaching of Arithmetic.

Group II, 2d semester. 3 periods, 3 hrs. credit.

This course aims to develop a systematic presentation of the facts and principles of arithmetic with special emphasis upon the topics that are most significant in the work of the intermediate grades. The treatment illustrates at every step the most effective methods of teaching arithmetic. Attention is given to the results of the recent experiments in the psychological processes involved in the teaching of arithmetic and to the measurement of efficiency in this subject by the standard tests and scales. Observation of the teaching of arithmetic in the intermediate grades is an essential part of the course.

Mathematics 32—The Teaching of Mathematics.

Group III, 2d semester. 3 periods, 3 hrs. credit.

This course includes important topics in the teaching of arithmetic in the seventh and eighth grades and in the junior high school. Emphasis is placed upon the commercial and industrial applications of arithmetic, with much practice in the making and solution of problems. Attention is given to the teaching of a course in composite mathematics in the junior high school. The use of standard measurements is given consideration. Observation of the teaching of mathematics in these grades is a requirement of the course.

Mathematics 42—The Teaching of Arithmetic.

Group IV, 2d semester. 3 periods, 3 hrs. credit.

This course aims to present a systematic study of the topics in arithmetic that are found in the course of study

of the rural school. A special effort is made to have students understand how to use the resources of the country in supplying opportunities for the application of arithmetic. Attention is given to the psychology of arithmetic and to the standard measurements in this subject. Observation is an essential part of the course.

Science.

Science 1—Nature Study.

All groups, 1st semester. 3 periods, 2 hrs. credit.

The word nature study is used in a broad sense to cover all phases of elementary science adapted to all groups. This course aims to give the student a definite body of knowledge of common forms of environmental materials and to supply the principles that will guide him in selecting and using environmental materials wherever he may be located. The course includes as wide a range of observation as possible of materials which the prospective teacher may be called upon to use in his work. Field trips are supplemented by laboratory study. For teachers of the upper grades a differentiation is made in favor of materials that supply the basis for further scientific study, especially in the field of biology.

Science 12—The Teaching of Geography.

Group I, 2d semester. 1 period, 1 hr. credit.

The emphasis in this course is upon the use of environmental materials for the purpose of developing in the minds of the children correct geographical concepts as to direction, location and geographical forms. Students have practice in choosing materials for study, as well as demonstrations of the material and methods employed by others. An attempt is made to furnish instruction that will enable the student later to adapt his knowledge to the environment in which he is teaching. A part of the time is devoted to laboratory and field work.

Science 22, 32, 42—The Teaching of Geography.

Groups II, III, and IV, 2d semester. 3 periods, 3 credits.

This is a general course in geography given from the standpoint of man's reaction to his environment and aims to co-ordinate fundamental principles of geography. The course is developed from the viewpoint of causal relations rather than the mere enumeration of facts and principles. As far as time permits some study is made of regional geography as a type of further application. Students get training in the organization and the presentation of geographic data through the use of the project and problem method; in the preparation and the use of maps, graphs, diagrams, and other illustrative material, and in the problems and methods involved in teaching field geography. Students are made familiar with the use of standard educational measurements in geography. The observation of classes in the teaching of geography is a necessary part of the course. Such differentiation in the application of the above principles and methods is made for the different groups as the course of study in geography requires.

Science 44—Agriculture.

Group IV, 4th semester. 3 periods, 3 credits.

A large purpose of this course is to give to the teacher of rural schools an insight into and a sympathy with the basic industry of the rural population and to appreciate the larger aspects of this industry as related to our national welfare. The rural teacher is instructed how to relate a knowledge of agriculture to the experiences of rural children with a view to motivating the teaching of the common branches. Opportunity is offered for participation in agricultural projects so that teachers can initiate and supervise projects with their pupils. Through this course teachers come in touch with the leaders of agri-

cultural improvement and learn of the available sources of information on agricultural subjects.

Social Studies.

Social Studies 12—The Teaching of History.

Group I, 2d semester. 1 period, 1 hr. credit.

This course begins with the consideration of the aims and purposes of history in the primary grades. The course is devoted mainly to a study and practice in oral presentation and dramatization; and a consideration of the organization of material for special days, festivals, and patriotic exercises. Particular advantage is taken of the results of the work of Dewey in expressing historical movements through industrial arts.

This course gives attention to work in civics with a view to having students teach children the fundamental civic virtues and afford a basis of social experience for the interpretation of new social situations as they arise. Emphasis is given to the teaching of significant civic virtues through stories, poems, songs, dramatization and various pupil activities.

Social Studies 22—The Teaching of History.

Group II, 2d semester. 3 periods, 3 hrs. credit.

This course includes a study of such history as will equip students to teach the history of the intermediate grades as recommended by the state course of study. Observation of teaching in these grades is a feature of the course.

Attention is given to teaching civics in the intermediate grades. The course for the fourth and fifth grades centers around the idea of community co-operation, emphasizing those who furnish us food, clothing, shelter, medical aid, light, transportation, protection, etc. The work for the sixth grade centers around the idea of industrial co-operation, with emphasis upon vocational

opportunities, study of community service through occupations, and the qualifications required for each occupation.

Social Studies 32—The Teaching of History.

Group III, 2d semester. 3 periods, 3 hrs. credit.

A course primarily for those specializing in social studies. An intensive course in the teaching of American history with emphasis on the European background. The difference between secondary and primary source material is shown and the student gets acquainted with available source materials as well as acquires a knowledge of the principal text and reference books. *The value and danger of historical parallels is shown as well as the importance of relating the study of history to current events. Students are taught to test historical data and to interpret historical facts.

The teaching of community civics follows bulletin No. 23, 1915, of the United States Bureau of Education. The larger responsibilities of citizenship and of patriotism as revealed by the World War are presented and the student gets acquainted with the many books in these fields available for children as well as the proper reference material for the teacher.

Social Studies 42—The Teaching of History.

Group IV, 2d semester. 3 periods, 3 hrs. credit.

This is a composite course in the teaching of history and civics using as a basis the report of the Committee of Eight of the American Historical Association and bulletin No. 23, 1915, of the United States Bureau of Education entitled "The Teaching of Community Civics." Special emphasis is laid upon the opportunities for citizenship in rural communities and upon the ultimate dependence which all civilization has upon the products of the soil. This course aims to develop resourcefulness in the student in the use of available text and reference books.

Social Studies 4—Citizenship.

All groups, 4th semester. 2 periods, 2 hrs. credit.

This course aims to clearly define the meaning of democracy and to discuss the fundamental problems in a democratic social system; to point out the community relationships as expressed in family, church, school, industry and state to the development of democracy; to emphasize the responsibilities of the individual citizen in his vocation, in his political activities, in his use of leisure, and in the many aspects of social intercourse to the life of democracy; and to all the phases of democracy to make clear the responsibilities of teachers and of public education.

Social Studies 44—Rural Sociology.

Group IV, 4th semester. 2 periods, 2 hrs. credit.

The primary aim of this course is the inculcation in the minds of the students of a love for and just appreciation of the importance of a healthy country life, and includes consideration of such topics as: defects of present day country life, treated constructively; the lack of rural pride and rural co-operation; land tenantry; migration from the country to the city and its causes; co-operative buying and selling; the need for scientific agriculture; the country home; the country church; good roads; and the country school as an agent in intellectualizing, socializing and spiritualizing country life.

Arts.

Arts 1—Drawing.

All groups, 1st semester. 4 periods, 2 hrs. credit.

The aim of this course is to enable students to teach the public school course of study in drawing, including the representation of common objects, the elementary principles of design, lettering, composition, and color harmony in their application to dress, home, school, and

community interests; to give students facility and confidence in their ability to draw and illustrate on the blackboard a wide range of school subjects; to develop appreciation of art and ability to teach pupils the appreciation of art including the study of pictures. Such differentiation is made in this course for the different groups as the course of study requires including the teaching of the elements of mechanical drawing for the upper grades.

Arts 1, 1—Handwriting.

All groups, 1st semester. 4 periods, 2 hrs. credit.

At the beginning of this course the handwriting of students is measured by one of the handwriting scales and if they fall below the standard set for teachers they are put in special classes for practice. The time of this course is devoted largely to methods of teaching writing and to developing skill in blackboard writing. Students are instructed in the results of the recent investigations in the psychology of writing. Through measuring their own handwriting and the handwriting of children, students become acquainted with the use of handwriting scales.

Arts 12—Handwork.

Group I, 2d semester. 4 periods, 2 hrs. credit.

This course aims to instruct students in the use of various materials that will enable them to work out simple problems as they arise out of the daily necessities of food, clothing and shelter. Students learn to appreciate the problems that are within the interests of children and how such problems may be graded according to the child's control of technique. The course includes clay modeling, paper and cardboard construction and simple problems in wood and textiles. Students observe demonstrations of this work in the training school and participate in such work.

DELAWARE WATER GAP

FOOT BALL TEAM, 1919

Arts 23—Sewing.

Group II, 3d semester. 2 periods, 1 hr. credit.

The aim of this course is to enable students to teach simple stitches to pupils of the fourth, fifth and sixth grades and to handle projects in the making of various articles for personal and household use.

Arts 14—Handwork.

Group I, 4th semester. 4 periods, 2 hrs. credit.

This course gives continued attention to the use of handwork as an illustrative factor in the teaching of nature study, geography, history, literature, arithmetic, and the industrial activities of life. Emphasis is given to technique and the organization of such forms of handwork as may be used successfully in the regular class room. The course includes work in paper and cardboard, book-making, basketry, textiles, pottery, and wood. Students observe demonstration of this work in the training school and participate in such work.

Arts 4—Music.

All groups, 4th semester. 4 periods, 2 hrs. credit.

This course presupposes a knowledge of the elements of music. The purpose of this course is to fit students to teach music in the public schools. The salient features of this course are: A treatment of the child voice, a study of the tonal and rhythmic problems of each grade, ear training, melody writing, sight reading, and part singing, a study of the song material adapted to each grade, the use of the phonograph to develop musical appreciation, and the development of musical programs. Students are taught how to apply the standard musical tests to discover musical talent. Observation and practice teaching are a requirement of the course.

Arts 24—Prevocational Education.

Group II, 4th semester. 3 periods, 2 hrs. credit.

The aim of this course is to enable students to de-

velop for the pupils of the fourth, fifth and sixth grades an elementary knowledge of the industries concerned with the fundamental needs of clothing, food and shelter. The construction of a house is the objective of the course. It includes the making of paper furniture, the stenciling of patterns and the weaving of fabrics on small hand looms, simple carpentry work necessary for the erection of a one-story house and its partition into rooms, problems of distribution of size and space, convenience of access, and discussion of the question of lighting, heating, and ventilation, and the industries of carpentry, plastering, plumbing, bricklaying, stone masonry, etc. Students are taught to motivate the handwork of this course through their ability to discuss industrial processes, through excursions with their pupils to industrial plants or observation of workmen engaged in industry, together with the description and examination of materials.

Health Education.

Health 1.1—Personal and School Hygiene.

All groups, 1st semester. 2 periods, 2 hrs. credit.

Personal Hygiene—The aim of this course is to secure in the students settled habits in the care of the body which will lead to stronger, healthier and more efficient lives. The course aims to have students understand the hygiene of posture, nutrition, clothing, exercise, fatigue, rest and sleep; the causes of ill health and disease together with their control and prevention. Only those facts of physiology and anatomy which have special significance for hygiene are considered. The instructor will hold personal conferences with students as a part of the course. The aim of this course is to equip the student with the knowledge of school and child hygiene necessary for a teacher.

School Hygiene—The following topics are included; normal growth and its standards; the ill effects of malnutrition, bad air, lack of exercise, excessive exercise, lack of proper rest, defective vision, defective hearing, adenoids, diseased tonsils; remedies for various defects and the best methods of treating them from the school standpoint; hygiene of program making; school sanitation including school furniture, ventilation, heating, lighting, water supply, toilets, etc.; regulations of state and local boards of health; the problem of nutrition as applied to school children with laboratory exercises in food values and food preparation. Observation of good hygienic school conditions and of good hygiene teaching is an important feature of this course.

Health 12—Health Habits.

Group 1, 2d semester. 1 period, 1 hr. credit.

This course deals with the best methods of inculcating in the child proper habits of health, and includes methods of teaching cleanliness, value of bathing, care of the teeth, proper diet, tooth brush drills, proper clothing, protection of the eyes, importance of fresh air and sunlight, protection against contagious diseases, causes of fatigue, and the value of rest and recreation.

Health 1.2—Health Education.

All groups, 1st and 2d semesters. 3 periods, 1½ hrs. credit each semester.

Two hours each semester—Physical Education—floor work; apparatus; marching; rhythmic work, including clubs, wands, and folk dancing; games, athletics including track and field events, tennis, hockey, hiking, skating, etc. Corrective work including proper exercises for students unable to take regular gymnasium work.

One hour each semester—a graded course in health education including physical exercises and games arranged to meet the needs of children at various stages

of development through the grades. Discussion of the different theories of play, and the management and equipment of playgrounds. First aid in emergencies is included.

Health 3, 4—Health Education.

All groups, 3d and 4th semesters, 3 periods, 1½ hrs. credit each semester.

Two hours each semester—Physical Education—floor work; apparatus; marching, rhythmic work, including clubs, wands, and folk dancing; games; athletics including track and field events, tennis, hockey, hiking, skating, etc. Corrective work including proper exercises for students unable to take regular gymnasium work.

One hour each semester—the graded course in health education for children continued. Demonstration lessons and student teaching. Athletic activities for use on playground. Physical examination of school children.

Social Hygiene—a part of the time of this course is devoted to a discussion of problems of heredity, environment, sex hygiene and eugenics.

THE NORMAL SECONDARY COURSE

Because many localities still lack High Schools prepared to qualify pupils for entrance to the Normal course, we will maintain a Secondary or High School course. In some localities, also, boys and girls leave school early and after several years desire to resume their studies when in age and experience they no longer fit in the local classes to which they could be admitted. To such persons also the benefits of our Secondary course are offered.

The Secondary course is that fixed by the Department of Public Instruction for first class High Schools.

Students who complete this course with us will receive High School certificates.

The students in this course will also have their tuition paid by the State if they are seventeen years of age or over.

Preparation for College and University

Our Normal Secondary course not only prepares students for the Normal course, but is also a preparation for entrance into college. The electives of the course enable students to select and arrange their work with reference to the entrance requirements of the college or university of their choice. We have sent students to all the large colleges and universities in the East, and their high standing there attests the excellence of their preparation.

The graduates of the Normal School are admitted to advanced standing in both colleges and universities. They thus enjoy a double advantage. They become established in a profession with a sure earning capacity and at the same time are prepared for further study that will admit them to the highest and most remunerative activities of the profession.

Commercial Training

Instruction is offered in commercial work. To those interested, and able to take advantage of this instruction the course will give a general and comprehensive grasp of business principles without undertaking the finished and complete work which we believe is really the function of a business college and not of a Normal School.

A knowledge of modern business methods is becoming more and more essential to persons in every walk of life, and to teachers such knowledge is imperative. The instruction in bookkeeping and business forms will prove a valuable aid to the teacher in the later preparation of the necessary school reports, while proficiency in stenography and in the use of the typewriting machine is always a great advantage. But more important from the standpoint of the prospective school teacher is the fact that there is a growing demand for the commercial branches in rural and secondary schools, while in practically all High Schools this work is required. Thorough preparation for teaching therefore demands that attention be given to these branches.

Our work has been arranged with a special view towards meeting these needs. The instruction embraces Bookkeeping, Penmanship, Stenography, Typewriting, and business organization and practice.

Inasmuch as all students procure in the regular course instruction in the allied subjects such as business Arithmetic, Commercial Geography, Composition and Rhetoric, English Grammar, and Spelling, we feel that those taking advantage of this opportunity secure exceptional and valuable training which is as complete and thorough as is consistent with its relation to the regular teaching course.

Full credit is given on the regular State Diploma for all work done in this department.

Music

All students who intend to graduate are required to take a course in vocal music to prepare them to teach music in the Public Schools. They are given opportunity to teach music in the Model School under the direction of the supervisor of music.

Voice placing, Sight singing, Harmony and Music History are taught.

A Male Glee Club, Women's Chorus, and Mixed Choral Society are maintained and give opportunity for those who sing to secure instruction in part-singing and interpretation.

A Piano course as follows is offered:

First Year

Elementary work.

Hand formation.

Technic.

Melody Studies.

Phrasing.

Second Year

Technic.

Elementary Harmony.

Studies in Phrasing.

Pieces of moderate difficulty.

Ensemble Playing.

Third Year

Technic.

Harmony.

Advanced Studies in Phrasing and Interpretation.

Selections from Bach, Mozart, Schumann, Handel, Schubert, Mendelssohn, etc.

Practice in Public Playing.

Fourth Year

Advanced Technic.

Harmony.

Counterpoint.

Phrasing.

Selections from Classic and Modern Composers, Beethoven, Chopin, etc.

Accompanying of Chorus work and Advanced Chamber Music.

Graduation.

Recitals are given during the year.

THE MODEL SCHOOL

In connection with the Normal School, a Model School is maintained. This school is housed in a new and commodious building, well equipped and modern in every particular. Its class rooms are light and airy; the assembly room for the pupils is large and attractive; and the school maintains its own library, which gives its pupils access to wholesome and helpful books and magazines.

The Model School consists of a Kindergarten, an Elementary School, a Junior High School, and one year of Senior High School. The teaching is done by the Seniors under the close supervision of the Model School principal and assistants. Here the seniors put into actual use the principles of teaching taught in the Normal School, become acquainted with aids and various devices in teaching, and receive instruction and gain experience in handling classes. Each senior teaches two hours a day for one semester and is given the privilege of choosing his own grade of work.

The Course of Study for the Model School conforms with the state requirements for regular public schools. The aim of the Junior High School, which is a new department, is to give the child "practical" experience. The day is divided into six periods of one hour each; four of these hours used for academic work and two for shop work (including Sewing and Cooking for girls and Mechanical Drawing and Wood-work for boys). The shop life inculcates the spirit of work.

Athletics and social activities under the direction of teachers, together with Student government—all serve to develop school spirit and eventually a high type of citizenship.

RULES AND REGULATIONS

In an institution intended like ours to prepare teachers, the students should be self-disciplined. If they are not, or cannot be made so in a reasonable time, they are undesirable, and it is the policy of the school to ask such to withdraw. The following rules have been adopted as guides to the safety, comfort, and welfare of all, and the good reputation of the school.

1. Loud talking, whistling, scuffling or any other rude and boisterous behavior in the buildings is strictly prohibited.

2. The use of tobacco in any of its forms in or about the buildings, and the use of intoxicating drinks or profane language and card playing are strictly prohibited.

3. No dirt or other refuse shall be thrown from the windows, nor thrown into slop sinks or toilets; waste baskets are provided for this purpose on all the halls.

4. Students shall not visit each other's rooms during the regular hours of study except by special permission of the teacher in charge.

5. No student shall withdraw from the school during the session without permission from the Principal. It is desirable that students leave school as little as possible during the terms, and no permission will be granted to visit relatives or friends at a distance, or friends in town or vicinity over night unless a written request for such permission is received by the Principal from a parent or guardian.

6. All students are expected to be regular and prompt in attendance at class, chapel and meals.

7. Ladies and gentlemen are not allowed to associate together, excepting at such times and occasions as may be designated by the Principal. Standing in groups in the main corridors, or prolonged conversations are not allowed.

8. Each occupant will be held responsible for the condition of his or her room and any damage done to furniture. No nails, screws, tacks, etc., shall be driven into the walls, doors, windows, furniture, etc. No contrivance shall be attached to locks or transoms for the purpose of opening them. Climbing into rooms over transoms breaks the locks and doors, and is prohibited. Pressing botanical specimens under bed post, breaks the rails and head boards, and is, therefore, also prohibited.

9. No student shall withdraw from classes to which he has been assigned without special permission from the Principal.

10. No gentleman not connected with the school will be permitted to meet, walk, or ride with a student of the opposite sex except in cases of necessity and by permission.

11. Students shall attend public worship each Sunday morning at the church of their choice or designated by parents or guardian.

12. It is to be understood by the students that it is enjoined upon the members of the faculty to see to it that the requirements of the school are complied with, and that they have full authority to correct any improper acts that may come to their notice.

13. While danger from fire is reduced to a minimum by ample arrangements for extinguishment, and by fire-escapes abundantly provided for each floor students are not permitted to use or have candles, lamps or stoves, electric irons or heaters or cookers, or any preparation for producing fire or heat in their rooms.

14. Students may not entertain visitors over night without having first made arrangements to do so with some proper authority.

Breakfast, 7:00 a. m.; Dinner, 12:00 m.; Supper, 6:00 p. m.; Study Hour, 7:00 p. m.; 1st Retiring Bell, 9:45 p. m. Lights must be out promptly at 10:00 p. m.

MISCELLANEOUS.

Library and Reading Room

The Library and Reading Room contain reference books, standard literary works, International and Standard dictionaries, cyclopedias, daily papers, magazines, leading periodicals, and educational journals. Lately large additions have been made of books on travel, history and pedagogy.

Mrs. Margaret C. Brodhead has presented to us a number of valuable works, and we have developed a plan for making regular monthly additions of the best new books published. This plan has proved so satisfactory that we shall continue to adhere to it.

Lectures

In order that the students may have opportunity to hear some of the best lectures and musical attractions during the year, a course of four or five entertainments is arranged.

In addition to this the Music Department of the school gives a concert, and the Societies each a public entertainment. The Model School gives a closing Concert and other interesting exercises.

The commencement concert is always a very interesting feature of the year.

Literary Societies

There are two flourishing Literary Societies, the Minisink and the Shakespearean, which hold meetings every Saturday evening. All students except such as cannot attend are required to join one or the other. These societies hold open meetings on the first and second Friday evenings following the opening of each term.

Christian Influence

The Young Men's Christian Association, organized in the Fall of '93, has continued a steady growth since. The meetings are held in the Chapel every Sunday morning. It is doing a good work among our young men.

The Y. W. C. A. is equally as flourishing and its influence for good is very marked. The meetings are held in the Model School Chapel every Sunday morning.

Every Sunday evening all the students whose church relations do not forbid it are required to attend Bible study in the Chapel. The study is conducted by the Principal. Subjects in controversy among the churches are passed by.

Sunday morning, students are expected to attend some one of the churches in the towns—naturally the church to which they or their parents belong.

Devotional exercises are conducted in the Chapel each noon by the Principal or a member of the Faculty, at which all the students are expected to be present. Students whose church relations do not permit them to be present during the religious exercises are required to present themselves there for the announcements.

Athletics

A large part of the campus has been fitted up as an athletic field. It is kept in good condition, and a commodious grand stand has been erected upon it. The Trustees encourage athletic sports by contributing money freely for their support. The athletic spirit among the students is strong and healthy.

Laundry

Each pupil is allowed to send to the laundry 12 pieces of clothes per week, including handkerchiefs, napkins and

towels. In calculating these 12 pieces a pair of cuffs is counted as one piece, and a pair of hose as one piece. The fact that pupils may have put in less than 12 pieces during any one week does not entitle them to put in more than 12 pieces any other week. For the ladies only three starched pieces will be laundered per week. These starched pieces will not include white shirt waists, white dresses, or white dress skirts. Such articles will be laundered at a cost not exceeding forty per cent. of the public laundry charges. White petticoats will be washed the entire year, but will be ironed free only during the months of September, October, May and June. Woolen and merino dress skirts will not be done in the laundry. Each article of clothing must have on it the pupil's name, plainly marked with indelible ink. Clothes which are not marked will be returned unlaundered. Clothes must be taken to the laundry in laundry bags, each bag must have pupil's name plainly marked on it with indelible ink. No clothes will be washed for any student the first week or the last week of any term.

Outfits

Each pupil is expected to furnish, for personal use, one bed comforter or a pair of blankets, also towels and napkins. These must be plainly marked. All articles of clothing likely to be sent to the laundry, must be plainly marked with indelible ink. As no silverware is allowed to be sent from the Dining Room, a knife, fork and spoon should be included in the outfit for use in cases of sickness. Slippers, overshoes, an umbrella and raincoat should also be included.

Expenses

The expenses are as low as is consistent with the furnishing of adequate and wholesome board. Comparison

of the expenses of our school with those of private preparatory schools furnishing the same standard of board will show that with us they are in many cases hundreds of dollars less.

The tabulated statement following will give at a glance information covering the total charges. This statement is followed with detailed directions as to the time of payment. We present the matter in this way in order to avoid misunderstandings on the part of our students. It will be noticed that the school accounts are payable four times during the year, at entrance, at the middle of each semester and at the beginning of the second semester. Each payment will cover ten weeks in advance. The rules of the school provide that no student whose account is not settled in full at the end of a payment period may be carried in the school work until the bills of the previous period are paid in full.

Parents and students are advised that no bills are sent from the school unless especially requested.

Table of Expenses

BOARDING STUDENTS	1st Semester	2nd Semester	Full Year	Fraction of Sem. per week
Board, Room, Heat and Laundry	\$140.00	\$140.00	\$280.00	7.00
*Tuition	40.00	40.00	80.00	2.00
Registration Fee.....	\$5.00	5.00	10.00	
DAY STUDENTS				
*Tuition	40.00	40.00	80.00	2.00
Registration Fee.....	5.00	5.00	10.00	
FEES FOR LABORATORY WORK				
Chemical Laboratory.....			5.00	
Agriculture, Geology, Zoology, Botany, Physiology, each.....			1.00	
Household Arts— Cooking Laboratory.....			2.00	

*Tuition is paid by the state for all students seventeen years of age or over who intend to teach in Pennsylvania and are in the regular Normal Course.

Time of Payments

Sept. 7, 1920.

Board	\$70.00
Registration Fee	5.00—\$75.00

Nov. 16, 1920.

Board	\$70.00—\$70.00
-------------	-----------------

Jan. 31, 1921.

Board	\$70.00
Registration Fee	5.00—\$75.00

April 11, 1921.

Board	\$70.00—70.00
-------------	---------------

Tuition for Model School students....\$2.00 per Semester.

Tuition for Kindergarten students....\$1.00 per Semester.

Rates For Music

First Semester, two lessons weekly.....	\$25.00
First Semester, one lesson weekly.....	15.00
Second Semester, two lessons weekly.....	25.00
Second Semester, one lesson weekly.....	15.00
Use of Piano, each Semester	3.00

Rates For Typewriting and Stenography

First Semester, classwork	\$15.00
Second Semester, classwork	15.00
Individual Instruction, Typewriting or Steno- graphy, per lesson75
Use of Typewriter for practice, each Semester.....	3.00

Note:—No one admitted to classwork after beginning of third week.

Incidental Expenses

The custom so common among boarding schools of using a long list of incidental charges to increase their incomes, thus adding materially to the expense of educating young people, we have never favored. It is always annoying to receive unexpected bills, and to meet unexpected costs. We have, therefore, reduced incidental charges to a minimum. Our only extra charges other than those specifically stated in the catalogue are for ma-

UNDEFEATED BASE BALL TEAM, 1920

BASKET BALL TEAM, 1919-1920

materials actually used by students in such work as art, manual training, and laboratory courses, and these materials we furnish at cost. Because of frequent variations in the market prices of such supplies it is no longer possible to specify a fixed charge for them in advance. While this policy gives us less money from the individual students than is received by similar institutions whose catalogued charges are lower than ours, we are satisfied with it because we believe it is more profitable and satisfactory to our patrons.

Deductions

No deductions are made for absence for the first two or the last two weeks of any term except by previous arrangement with the Principal. Positively no deductions will be made for the first or last week of any term.

For absence two or more consecutive weeks on account of personal sickness one-half of the usual charge for board will be allowed.

Damage Deposits

Every boarding student is required to deposit one dollar for the key to his room. If the key is given up when the student leaves school the dollar is returned to him. A deposit of \$2.50 is also required to secure the school in case of damage to the students' room or other school property. When no damage is done this money is also returned to the student when he leaves school. Damage charges are deducted from the amount.

Reports of Standing

Reports of the standing of students are sent to their parents or guardians at the end of each semester. In case such reports are not received the principal should be notified. Special reports may be sent at any time, and always will be furnished on request.

CATALOGUE OF STUDENTS.

1919-1920

POST GRADUATES.

Name.	Postoffice	County.	State.
Murphy, Thomas E.	Wilkes-Barre,	Luzerne,	Pa.
Sigafus, J. Dewey	Slateford,	Northampton,	Pa.

SENIORS.

Beville, J. Octavius	East Stroudsburg,	Monroe,	Pa.
Bohan, Sara B.	Nanticoke,	Luzerne,	Pa.
Boyer, Helen M.	Aquashicola,	Carbon,	Pa.
